Premium Precatalyzed Lacquer

Premium Precatalyzed Lacquer represents an intermediate step between our high quality water white lacquers and our extremely durable conversion varnish series. The blending of these two technologies creates a product with ease of application associated with lacquer, coupled with performance characteristics resembling the conversion varnishes. Premium Precatalyzed Lacquer is a single pack system requiring no additional catalyzation. It is supplied to the customer at ready to spray viscosity eliminating the need for additional thinners and solvents prior to application. This product meets all of the pertinent government regulations regarding emissions and meets or exceeds the performance standards outlined by the National Kitchen Cabinet Association (KCMA) and the American Society for Testing and Materials (ASTM).

ADVANTAGES

Regulatory

- HAPs & AIM Compliant

Application

- User Friendly - Ready To Spray
- Self-Sealing or Vinyl Sealer Available
- No Critical Recoat Time
- No Catalyst Required

Durability

- Meets KCMA Standards When Properly Applied & Cured.
- Water Clear - Resists Yellowing
- 29% Weight Solids

Availability

- one gallon • five gallon • 55 gallon
- 10° Flat • 20° Rubbed Effect • 30° Satin • 60° Semi Gloss • 90° Gloss
- White base available in all sheens

CUSTOM COLORS AVAILABLE

USES

Premium Precatalyzed Lacquer is a broad application coating with typical uses such as kitchen cabinets, fine furniture, interior woodwork and architectural millwork.

This product can be applied with HVLP, airless or air assisted airless. It is packaged ready-to-spray and does not normally require additional reduction.

Precatalyzed Lacquer

PERFORMANCE & TESTING DATA

Household Chemical Testing

Premium Precatalyzed Lacquer has been tested on the following common household chemicals with the final results below. For full testing information and additional technical specifications please request a complete Product Data Sheet (PDS) from your sale representative.

Catsup	No Damage	Vinegar	No Damage	Alcohol	No Damage
Olive Oil	No Damage	2% Ammonia.....	No Damage	Lemon Juice	No Damage
Nail Polish Remover	No Damage	Mustard	No Damage	Water	No Damage
Motor Oil	No Damage	Lighter Fluid.....	No Damage	1% Palmolive	No Damage
1% Tide Solution	No Damage	Tomato Juice	No Damage	Coffee	No Damage

Hot & Cold Resitance Test determines this coatings tolerance to extreme cold and hot cycles. All panels passed 21 cold check cycles (cycling from 120 F. to -5 F. and 70% relative humidity).
